

INTERNSHIP @ TIES

TIES is the leading environmental research organization in South India having cutting-edge infrastructure and resources, including testing laboratories and bioproducts production units. TIES have several field research and community development projects too. The internship programme at TIES offers a comprehensive and hands-on experience for interns in various scientific disciplines, including microbiology, biochemistry, biotechnology, and environmental science.

State-of-the-art Infrastructure:

TIES boasts state-of-the-art and unique infrastructure, providing interns with access to advanced tools and facilities.

Diverse Experience:

Interns at TIES have the opportunity to gain experience in a variety of scientific tools and methods, both in laboratory and field project settings.

Commercial Eco-Products:

Interns are involved in every stage of commercial eco-products, from laboratory development to packaging, offering a well-rounded experience in the production process.

Co-authorship Opportunities:

Interns have the chance to contribute significantly to research efforts, with the promise of co-authorship in research papers intended for publication in journals or proceedings.

Certificates:

Successful completion of the internship program is recognized with certificates, acknowledging the interns' achievements and commitment to the specified period.
